AMERICAN RADIATORS

ITALIAN FLUE VENTILATING RADIATOR.

We invite
Architects

To investigate the merits of our Italian Flue Radiator, equipped with Ventilating Base. The radiator proper has become the recognised leader in the Flue type. Consisting of all cored, prime surface, it insures the highest efficiency, in the most compact form.

The leading features of the Ventilating Base are simplicity of construction, ease of operation, capacity for ample supply of air. The base being wholly under the radiator, well recessed, it is entirely out of the way, and not liable to damage. The base, including dampers, can be removed for cleaning purposes and replaced under the radiator in five seconds' time. The dampers may be operated merely by slight pressure of the foot.

Circulars showing cross-section views and operation of radiator, also tables of dimensions, etc., mailed on application.

AMERICAN RADIATOR COMPANY

143 QUEEN VICTORIA STREET,
LONDON, E.C.

ACADEMY ARCHITECTURE

AND

Annual Architectural Review, 1895.

VOLUME II.

EDITED BY

ALEX. KOCH, Architect,

NOTICE.

MANY Architects and friends of this publication object to the advertisements therein, but the Publisher might be allowed to mention that they would object still more if the price of the work were to be increased in proportion to the cost of its production *without* advertisements. He is quite sure the sale would in such case fall off considerably, and the whole scheme might come to an end. It is therefore easily to be seen that the success of ACADEMY ARCHITECTURE is dependent not only upon the sale, but also upon the advertisements.

But Advertisers, who contribute largely to the cost of production, and thus enable the book to be sold cheaply, expect in their turn, of course, that their advertisements will be productive of business. They even ask more : they want to see that this particular advertisement in ACADEMY ARCHITECTURE is bringing in business ; and it would therefore be a great help if those who appreciate the publication and wish to assist in still further heightening its standard, would kindly *mention "Academy Architecture" when communicating with Firms advertising therein.*

If the above suggestion be responded to, the Publisher is confident that the ordinary advertisements will considerably increase, and enable him to discontinue, as soon as the existing agreements have run out, those which are most open to objection, viz. the special position advertisements between matter.

THE "PARAGON" BOLT (PATENTED).

THE ONLY
RATIONAL
BOLT.

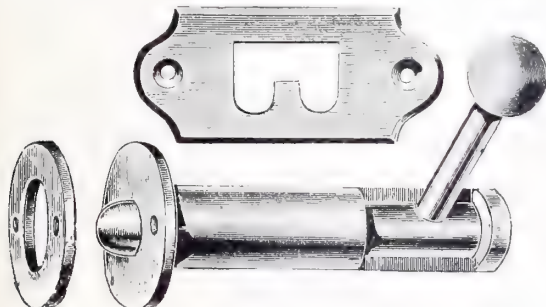

FOR THE PRESENT,
OF THE FUTURE,
AND
FOR ALL TIME.

Sketch showing portion of Door with Bolt and Socket as fixed.

ADVANTAGES of the "Paragon" Bolt as compared with Ordinary Bolts.

1. Great strength; is not dependent for security on a few small screws in the socket.
2. Exceeding neatness; no beading to be cut away for socket.
3. Shoots smoothly, and requires no force.
4. Dropping of door does not affect working of bolt.
5. Has no springs, and is practically everlasting.
6. Upper bolt on door can be fixed within easy reach, not of necessity at the top of door as with other bolts.

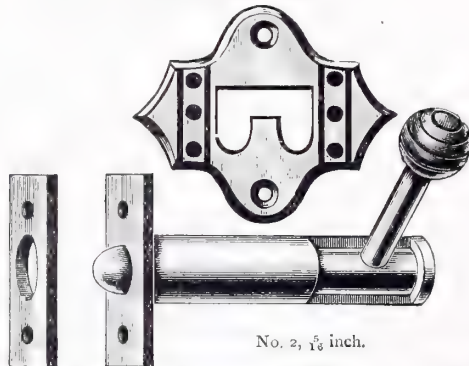

No. 1, $\frac{3}{8}$ inch.

Made in the following sizes:

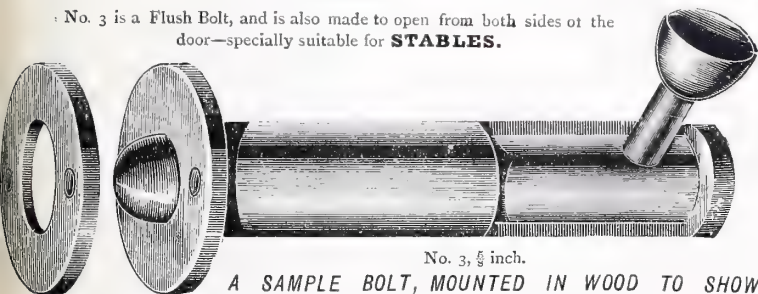

- No. 1.** $\frac{3}{8}$ in., $\frac{1}{2}$ in., $\frac{3}{4}$ in. **No. 2.** $\frac{1}{2}$ in., $\frac{3}{4}$ in., $1\frac{1}{8}$ in., $1\frac{1}{4}$ in.
No. 3. $\frac{3}{4}$ in.

The two smaller sizes No. 2 are suitable for small Cabinet work and Casements.

No. 3 is a Flush Bolt, and is also made to open from both sides of the door—specially suitable for **STABLES**.

No. 2, $1\frac{1}{8}$ inch.

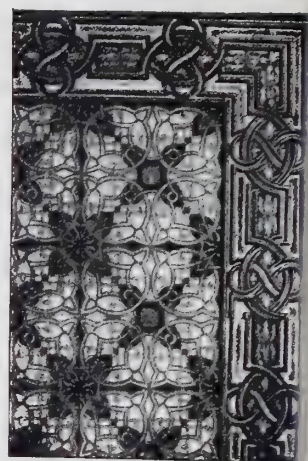

No. 3, $\frac{3}{4}$ inch.

A SAMPLE BOLT, MOUNTED IN WOOD TO SHOW ITS ACTION, AND ALL FURTHER PARTICULARS WILL BE SENT ON APPLICATION TO

TERRA-COTTA

IN RED, PINK AND BUFF.

WILDERNESS WORKS, WREXHAM.

THE Wilderness Terra-Cotta is an honest and beautiful material for building, in substance indestructible, with a hard surface, impervious to moisture, and unaffected by acids or atmospheric impurities. All the Wilderness Terra-Cottas are burnt their natural colours. No colouring matter is used in manufacture, nor are the goods "dipped" or "washed." The surface is that left by the tool, and the colour that made by the direct action of the fire on the oxides of iron contained in the clay. The Works are fitted up with the newest and best machinery for expeditious and large production, and are connected with the Great Western Railway Main Line.

Architects are invited to visit the Works, which are situated one mile and a half from Wrexham Station.

Samples will be sent on application.

Among other buildings now in course of erection, constructed wholly or in part of the Wilderness Terra-Cotta, are the following:—

K^AYE'S LOCKS

WE have much pleasure and confidence in inviting Architects to visit us here, to examine Samples, which we have no hesitation in saying have great advantages over all others made by well-known makers, for every kind of door, including cupboard, drawers, sliding doors, exit doors, fanlights; cart, wagon and gun-carriage doors; automatic wedge locks for railway carriage and brougham doors, as fitted on H.R.H. the Prince of Wales's brougham, and adopted by many Railway Companies, and which is the future lock for all carriage doors, and the best for house doors or any door which is released by turning a handle.

It is often thought that we only make locks known as the "Push and Pull"; but we make four other kinds which release the doors by turning a handle, which have special advantages over all others.

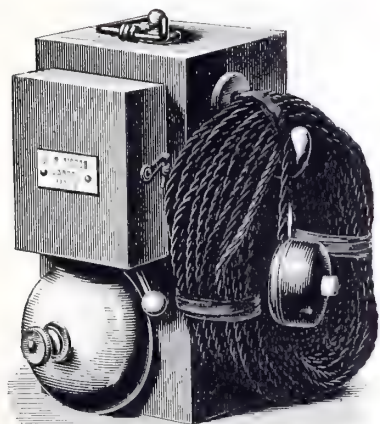

We take this opportunity of thanking Architects for past favours, and shall be pleased to wait upon them with Samples, and quote prices for every description of good work.

BURN BROTHERS' PATENT SANITARY APPLIANCES.

White Porcelain Enamelled Fireclay Sink.

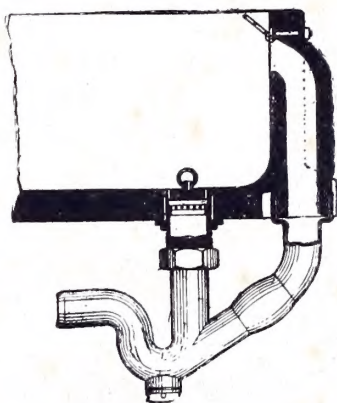

WITH PATENT "ANTI-FLOODING" OVERFLOW.

The overflow is fitted with a strong brass-hinged grating, which affords easy access for cleansing the overflow right down to the bottom of the trap.

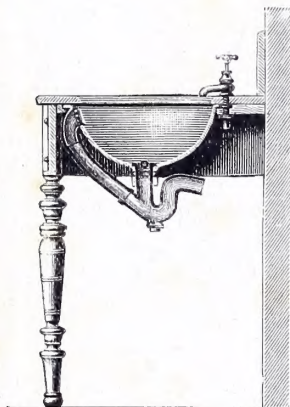

The overflow carries off all the water delivered by the taps.

Flooding nearly impossible—an important consideration for upper floors.

These sinks are made in the best ware and finished with exceedingly hard and durable enamel.

BURN BROS.' PATENT LAVATORIES.

These lavatories are constructed on the same principle as the above sink, and as every part of the waste is accessible for cleansing, they can be kept absolutely free from any objectionable smell. They are fitted either with plug and chain or with an arrangement to actuate the plug by means of a lift pull.

"ECLIPSE" PATENT DRAIN-TESTER.

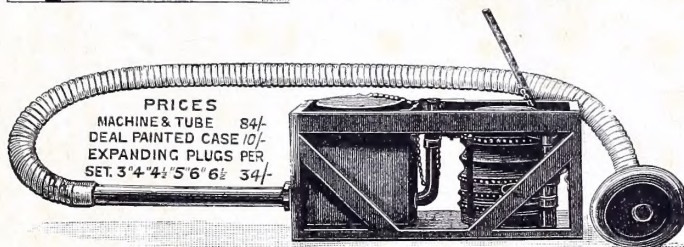

This is the ONLY SMOKE GENERATOR, of any description whatsoever, which supplies a positive test to Drains.

It consists of a double action bellows covered with specially-prepared leather, and a copper cylinder or vessel with an outer casing, which latter is filled with water. In this casing a cover or float is placed, which rises and falls with the action of the bellows. The hose must be connected to the drain or pipe to be tested, and all openings, such as ventilating pipes, plugged. A few strokes of the bellows will raise the float, and if it remains stationary the drain will prove tight. If the float falls, a leak exists, and may be traced by using the smoke-test.

A great advantage in using these Machines is that the operator can ascertain whether the drain is tight or not without leaving the apparatus. This apparatus is invaluable to Plumbers, Builders, Inspectors of Nuisances, Sanitary Inspectors, &c.

PRICES.

Machine and Tube (without plug), 84/-
Deal Painted Case, 10/-
